

Dr. Nikki's Field Notes

Dr. Nikki's Field Notes

Lizards are a type of **reptile**.

Example of reptiles are:

1. Snakes
2. Alligators
3. Lizards
4. Turtles

A **cold-blooded** animal needs the sun to stay warm.

Vertebrate animals all have a **backbone**.

Instead of hair or feathers, reptiles have **scales**.

Most reptiles don't eat vegetables, because they are **carnivores**.

Some lizards eat meat and veggies, so they are **omnivores**.

Reptiles are **oviparous**. This means that they lay eggs. Unlike birds, they're eggs are **soft-shelled**.

Dinosaurs were a type of reptile.
